WORKSHOPS OVERVIEW

WORKSHOP 1: Designing for Trust: Practical Capability-Building in the Age of Disinformation

Presenter: Anne-Lise Harding, IFLAPARL SC Member

Duration: 90 minutes

The workshop is designed to help participants move from understanding misinformation risks to designing tailored institutional responses. Through shared context-setting, peer exchange, and a hands-on design sprint using the UK Parliament's Good Information Toolkit, participants define their department's strategic ambition and adapt training materials to local needs. The session strengthens practical skills, strategic framing, and proactive approaches to providing reliable parliamentary information

WORKSHOP 2: Proactive Activities of Parliamentary Librarians – Publications and Curation

Presenter(s): t.b.a.

Duration: 90 minutes

The workshop aims to share case studies from the National Assembly Library, focusing on proactive services such as publications and curation, as part of their support for legislative activities. It will also provide an opportunity for participating parliamentary libraries to introduce and share their own publications. Through open discussion, participants will exchange ideas and explore collaborative approaches to problem-solving.
